CLASS- +3 3rd Year (6th SEM)
UNI. ROLL NO :-
S05321Z00003
REGD NO:- 14548/21

CERTIFICATE

It is hereby to certify that ,the original and genuine investigation work has been carried out to investigate about the subject matter and the related data collection and the investigation has been completed solely ,sincerely and satisfactory done by, Karunalaata Kanday student of class +3 6th sem under the roll no-S05321Z00003 for the academic session 2023-2024.

Regarding the inventory project entitled "Project on Zoo Management".

To the best of my knowledge this project was the original work of the candidate and has not been submitted in other university or institution.

I am satisfied with the project report and recommend its acceptance.

Sarojini Ekka
Mrs. Sarojini Ekka,
[HOD OF ZOOLOGY]

ACKNOWLEDGEMENT

I have taken efforts in this project. However, it would not have been possible without the kind support and help of many individuals. I would like to extend my sincere thanks to all of them.

It has been great honour and privileged to field visit at "Indira Gandhi Zoo Park, Rourkela".

I am highly indebted to Mrs. Sarojini Ekka ma'am and Muskan Sahoo ma'am for the guidance and constant supervision as well as for providing necessary information regarding the project and also for their support in completing the project. Her constant guidance and willingness to share her vast knowledge made us understand this project and its manifestation in great depths and helped us to complete the assigned tasks on the time.

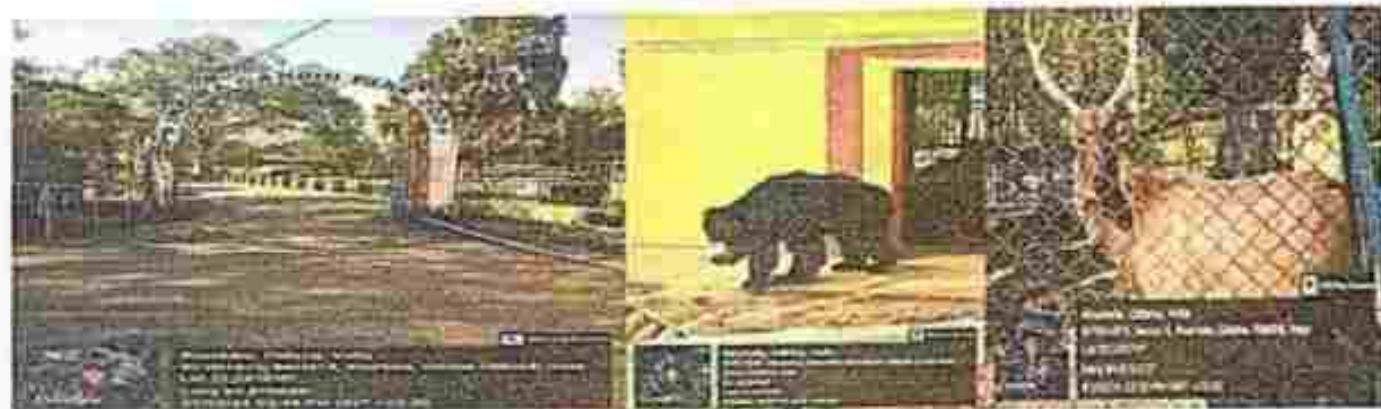

I would like to express my gratitude towards my parents and members of Indira Gandhi zoo Park,Rourkela for their kind cooperation and encouragement which help me in completion of this project.

INTRODUCTION

Zoo (a short form of zoological park and zoological garden).zoo is a place where animals are kept behind the enclosures.

Main purpose of zoo is : 1.For education
2.For conservation
3.For recreation
4.For research

ZOO MANAGEMENT: Zoo management is the managing of a zoo. The first priority of managing a zoo is to keep the business running : zoo management has to ensure that the business is run properly and that visitors are attracted to the zoo.

ZOO MANAGEMENT is divided into 2 types : 1.Animal management
2.Staff management

Animal Management :Three things are covered by animal management :

- 1.Health management
- 2.Nutritional management
- 3.Enclosure management

Staff of the zoo management have to ensure timely that every animals are getting vaccinations timely or not for their good health. They also check daily feed schedule of animals by which animals get nutrition. They also clean and disinfect the area where animals kept for avoiding the infection and for the better health and hygiene of the animal.

Staff management : Includes all the things which fall under Human resources. They have to play their important roles according to their posts .They have to take care or ensure :

- Health Check up of employees for zoonotic diseases.
- Developmental works carried out in the zoo during the year.
- Education and awareness programmes during the year.
- Seasonal special arrangements for upkeep of animals
- Research work carried out and publications.
- Annual inventory of animals.
- Mortality of animals.
- Status of the compliance with conditions stipulated by the Central zoo authority.
- List of free living wild animals within zoo premises.

HISTORY OF THE ZOO

A Botanical Garden was established in the early 1960's, and a few species of birds and some spotted deer were given place there. It was subsequently christened as Indira Gandhi Park Zoo. With passage of time, new species were introduced to the collection and was given recognition by Central Zoo Authority in the year 1995 as Mini Zoo and subsequently in addition of animals and other related facilities further recognized as a Small Zoo.

Indira Gandhi Park Zoo is situated in the centre of Rourkela city, the industrial capital of Odisha on the Howrah Mumbai Railway line. It owes its splendor to the natural surroundings of the Chhotanagpur hill range amidst the tranquil environs and soothing natural beauty with a small lake. Indira Gandhi Park Zoo is spread over an area of 50 acres where six varieties of mammals, thirteen varieties of birds and four varieties of reptiles are housed for conservation as well as education for the visitors.

VISION

To achieve the distinction of an outstanding zoo through conservation, education, research and spreading awareness for wildlife protection with exciting visitor experiences by connecting people to biodiversity conservation.

MISSION

Develop amongst visitors' an empathy for wild animals and motivate them to support the cause of conservation of wildlife and also to provide holistic nature conservation education with wholesome recreation.

OBJECTIVES

- a. To provide a glimpse of some of the flora and fauna of the region
- b. To maintain a natural ecosystem in the Steel Township

ABOUT INDIRA GANDHI PARK ZOO, ROURKELA

Indira Gandhi Park Zoo and Deer Park is one of the major conservation centre for wild animals in Western Odisha. The prime objective of the zoo is to spread awareness on Conservation of wild fauna among the common public. The Zoo boasts of a landscape with soft green grasses, the glossy leaves of varied bushes, the canvas of canopies of a good collection of trees, the colorful beds of seasonal and perennials, beautiful roses of more than 150 different varieties. It is a pleasure to loosen up amidst nature in the serene surroundings. Animals like the crocodile, Indian rock python, gharial, barking deer, sambar and spotted deer, four horned antelope and birds like the Indian peafowl, white ibis, varieties of pheasants, exotic birds like love birds, budgerigar, cockatiels, blue and gold macaws,

emus and ostriches are the major attractions for the visitors. A 'Zoo Aquarium' with 16 aquarium boxes houses different ornamental fishes is an additional feature enriching the zoo.

Deer Park is another unit of Indira Gandhi Park Zoo situated at Sector-8, Rourkela amidst dense vegetation and simulated habitat. The Deer Park is housed only spotted deer species for conservation and visitor awareness. The Deer Park was dedicated to the public by Sri V. Krishnamurthy on 16.02.1989, the then Chairman of Steel Authority of India Limited. Initially, the deer population was increasing more than hundred due to successful breeding among themselves.

5	Sri Kartik Nayak	Hort. Attendant	29.01.2020	Good Health

Development Works carried out in the zoo during the year

- a) Construction of Zoo Hospital with all facilities for treatment and healthcare of zoo inmates.
- b) Construction of Interpretation Centre has been started at the entrance of IG Park.
- c) Construction of separation of service path and visitor path for the animal enclosures
- d) Elevation of 400 m of the perimeter wall to a height of 2.0 m from ground level on both sides
- e) Repair work of chain-link mesh, MS iron structures and colour painting of iron structures of Aviary.

Education and Awareness programmes during the year

Indira Gandhi Park Zoo is one of the major places for the students to learn about wildlife conservation in the western part of Odisha. Zoo Education Programme is a regular affair of the zoo activities every year. During the year 2019-20, more than 700 students took part in the zoo education programme in different occasions.

Seasonal special arrangements for upkeep of animals

Special arrangement for the zoo animals are taken care during scorching summer and hardest winter periods. During summer, different animals were provided with extra shed to beat the heat. The zoo management ensures the potable available in all enclosures. Additionally, electrolyte powder was provided to the birds to prevent dehydration. Gunny sheets were provided to pheasants with spraying water on it is one among the daily activities during the summer period. Moreover, desert coolers were provided to different animals like, macaque, pheasants, macaws. The rest sheds were provided covered with hay to reduce direct effect of

heat during the hot summer. To monitor temperature of the enclosure area, thermometers were installed for vigil observation.

During the hardest winter of the year, reptiles and avian species are cared most to survive against the cold. Straws are being provided to Indian rock pythons to stimulate the hibernation activities. Basking area is being provided to mugger and gharial with sand bank in the enclosures. External heat sources were provided to the birds like macaws, budgerigars, love birds, cockatiels during the night time to get additional heat.

Research work carried out and publication

Students of degree college of Rourkela had undertaken research project for their curriculum at Indira Gandhi Park Zoo. The students focused on different faunal diversity in captivity as well as free ranging wildlife. During the year, 6 nos. of students of Ispat Autonomous College, Sector – 16, Rourkela had undertaken short-term research projects .

- Compliances with conditions stipulated by Central Zoo Authority

Sl. No.	NORM UNDER RZR, 2009	Conditions Stipulated	Status with regard to compliance of the conditions
1	10.1 (3)	The visitors' path and service path are overlapping at many places which need to be done appropriately aligned. The same should be proposed accordingly in proposed the Master (Layout) Plan/ Master Plan.	Separation of Visitors path and Service path has been completed by December 2019 except Aviary. The aviary shall be modified as per the suggestion put forth by evaluating officer.

2	10.3(1)	The Zoo Operator has not posted whole time officer in-charge of the Zoo. Veterinarian of the zoo and Officer in-charge of the zoo are one and the same.	Whole time Officer-In-Charge of the zoo and Senior Veterinary Officer are same.
3	10.2(2)	The Zoo Operator has not posted scientific and technical staff as mandatory for a 'Small Zoo'. A Biologist should also be appointed.	Contract for posting of scientific and technical staff has been finalized and work started from Jan, 2020.
4	10.3(3) & 10.5(6)	i. The purpose of operating zoo in two units at a distance from each other in the Rourkela Township is not justifiable for proper management of the animal. It is viable to operate the zoo at one single unit. ii. Theme of display and viable sex ratio of animals shall be maintained immediately.	Letter for transfer of spotted deer of Deer Park, Sector-8 has been communicated to Forest Department, Govt. of Odisha on 14.03.2008. However a fresh communication regarding release of surplus nos. spotted deer to DFO, Rourkela Forest Department, Govt. of Odisha has been done on 30.11.2019.
5	10.3(7) & 10.5(6)	The Zoo should not accept the rescued animal disproportionate to the availability of infrastructure and also submit a detail report on such animals acquired in the past.	Presently the rescued animals have been housed in suitable enclosure. List of rescued animals acquired in the past has been communicated to PCCF (WL) & CWLW for necessary action (copy attached as Annexure-1).
6	10.4(1)	The zoo as per proposed master (layout) plan shall modify its existing enclosure in nature increasing enclosure. The moat should be preferred as front barrier towards visitor	Modification of the enclosures as per the suggestion of the Scientific Officer, CZA which shall be taken up in FY 2020-21.
			viewing side in place of chain link fence.

7	10.3(2)	All the animal enclosures in the zoo are not in accordance with the specification of the CZA. The enclosure should be re-modified and appropriately designed following the guidelines and norms of the CZA in this regard.	The enclosures shall be re-modified after approval of Master (Layout) Plan and designs from CZA. We have already submitted Master (Layout) Plan to CZA for approval.
8	10.3(3)	The enclosures of the birds are very dingy and do not provide appropriate space for birds, keeper and visitors. This needs immediate attention.	Modification of bird enclosures shall be taken up after approval of Master (Layout) Plan and sanction of budget.
9	10.5(5)	A schedule for disinfection of enclosures should be prepared and implemented in the zoo.	Schedule for disinfection of enclosures has been already in vogue and submitted (copy attached as Annexure-II).
10	10.6(1)	The zoo shall submit a report on completion of ongoing work of Veterinary Infrastructure and its use with documentary proof.	The veterinary infrastructure including veterinary hospital has been completed. Photos of the new IG Park Zoo hospital is attached at Annexure-III.
11	10.6(5)	The Veterinary support staff should be deployed as per prescribed norms.	Posting veterinary support staff on contractual basis has started from Jan, 2020.
12	10.9(4)	The single sex animals like Rosy pelican and Golden pheasant should be paired.	Proposal for pairing has already been communicated to Nandankanan Zoological Park on 31.01.2019. After obtaining approval the job shall be taken up on priority basis.

13	10.9(9)	<p>The population control measures should be adopted to bring the population of the deer species with carrying capacity or surplus population may be shifted to nearby zoo or released back to its natural habitat.</p> <p>Population control measure for spotted deer in deer park has already been taken up by separating the male and female deer.</p> <p>Letter for transfer of spotted deer of Deer Park, Sector-8 has been communicated to Forest Department, Govt. of Odisha on 14.03.2008. However a fresh communication regarding release of surplus nos. spotted deer to DFO, Rourkela Forest Department, Govt. of Odisha has been done on</p>
	14	10.12(3)

The visitors' path and amenities like toilet should be provided with access to 'Divyang' personnel and wheel chair should be made available.

ROSY PELICAN

ROSY PELICAN

Habitat: Shallow water bodies like lakes, ponds, rivers, and reservoirs.

Life span: 12-15 years

Conservation status: Vulnerable

Distribution: Found in Africa, Europe, Asia, Australia, and Oceania.

Interesting facts: They have a long beak and a large throat pouch used for catching fish.

Rourkela, Odisha, India
7 stpi, Sector 5, Rourkela, Odisha 759002, India
Lat 22.242599°
Long 84.872688°

ROSY PELICAN

Scientific name :*Pelicanus onocrotalus*

Distribution :Found year-around in Africa, South of the Sahara desert. Migratory populations are found Eastern Europe to Kazakhstan during the breeding season.

Interesting facts : In breeding condition the male has pinkish skin on his face and orangery skin.

Males are larger than the females and have a long beak.

Habitat:Shallow,warm water of lakes ,deltas, marshes and swamps, heels, lagoons and tidal creeds.

Life span : 12 to 14 years

Weight	9 to 15kg
Total length	1.6 to 1.8m
Wingspan	6.7 to 11.8ft

BLUE AND GOLD MACAW

► BLUE AND GOLD MACAW

Scientific name : Ara ararauna

Distribution : This species occurs in Venezuela and south to Peru Brazil Bolivia and Paraguay.

Interesting facts : The blue and yellow macaw uses it's powerful beak for breaking nutshells and also for climbing up and hanging from trees.

Feeding habitat : Macaws primarily get nuts, seeds and fruits.

Feeding captivity : Fruits, peanuts, soaked moving, sunflower seeds, walnut, cuttlefish bones etc.

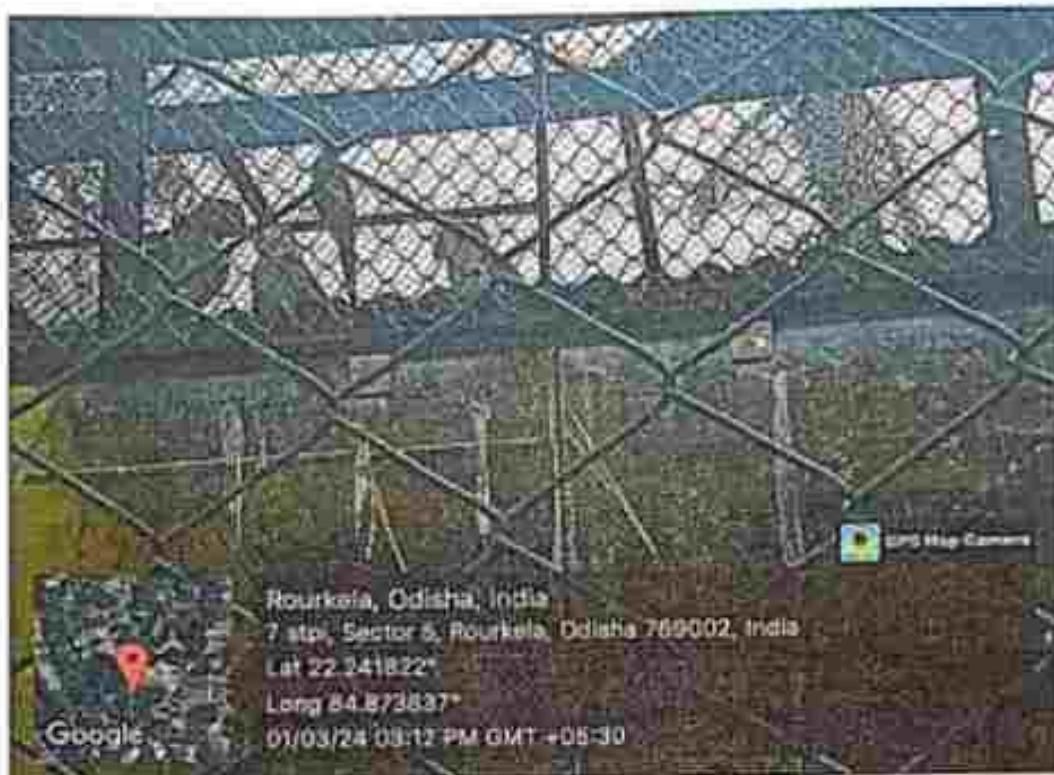

Habitat : It lives in wooded areas usually near water including edge of lowland humid forests.

Life span : 30 to 35 years

Conservation status least concern

Size	
Weight	900 to 1200gms
Length	102-112.5cm

PARROT

PARROT

Scientific name : *Psittacula krameri*

Distribution : This species occurs in Venezuela and south to Peru Brazil Bolivia and Paraguay.

Interesting facts : Also known as Indian Ring-necked parakeets, these beautiful small parrots grows upto 40cm long, which includes their tail feathers. Only the males have the red or black ring around the neck that gives them their name. The rose ringed parakeet performs direct and fast flight than the other parakeets. Curved beak and clawed feet.

Habitat : Rain forests, grasslands, Savannahs and islands.

Life span : 20years

Conservation status Least concern

Size	
Weight	64g-85g
Length	6-100cm

INDIAN PEAFOWL

Scientific name :*Pavo cristatus*

Distribution : Throughout India, Bangladesh and Sri Lanka .

Interesting facts : The Indian peafowl is a brightly colored bird that lives mainly on the ground. Its loud calls make it easy to detect, and in forest areas often indicates the presence of a predator. It is the national bird of India. Having blue fan like crest of spatula-tipped wire -like feathers, and is best known for long train(tail)made up of elongated upper tail covert feathers which bear colourful eye spots.

Habitat : Found in deciduous forests ,also found in variety of forests and crop fields, villages, towns etc.

Life span : 20-30years

GHARIYAL

GHARIAL (गढ़ियाल)

Classification: Reptilia → Chelonia → Gavialidae → Gavialis gangeticus

Distribution: Found in the lower reaches of the Ganges River, Brahmaputra River, Meghna River, and the Sunderbans.

Interesting facts: Gharials have a very long neck; they can grow up to 10 feet long; they are apex predators; they have a unique breathing system.

REASON: Habitat loss and hunting for their meat and skins.

GHARIAL

Scientific name : *Gavialis gangeticus*

Distribution : Himalayan fed river systems in the north of the Indian subcontinent and Mahanadi river system .

Interesting facts : Adult males with a large pot like cartilaginous mass on the tip of snout hence the name gharial.

Habitat : Deep and fast moving rivers with a sand

Life span : 12 to 14 years

SITES

	Male	Female
Weight	150-250kg	150-250kg

GHARIAL

RHESUS MONKEY

RHESUS MACAQUE

Scientific name : Macaca mulatta

Distribution : Northern India, Bangladesh, Pakistan, Burma, Thailand ,Afghanistan, China and neighbouring areas.

Interesting facts : Rhesus monkey has cheek pouches to store food for short periods of time, like other macaques. Rhesus monkey is the first primate to be sent into the outer space in a space ship. The 'Rh-factor ',one of the elements in the persons blood group, was discovered with the blood of this monkey by Karl Landsteiner and Alexander Wiener.

Habitat : Arid and open areas , forests, grasslands, woodlands, mountain upto 2500m altitude near human habitation.

Life span : 15 to 20years

Conservation status: Schedule 2

Rhesus monkey

CROCODILE

MARSH CROCODILE (Croc)

Scientific Name: Crocodylus palustris
Distribution: India, Sri Lanka, Nepal and Myanmar
Interesting facts: It has a unique ability to bury itself in mud to regulate its body temperature.

Habitat: Freshwater habitats like rivers, swamps and lakes.
Lifespan: Up to 70 years.
Conservation status: Schedule I.

The ostrich egg averaging about 150mm in length by 125mm in diameter. A adult male may be 2.75meter tall. The head is small with big brown eyes with black lashes.

Habitat :grasslands, Savannah, shrublands of southern and eastern Africa.

Conservation status :not endan-

IMPORTANCE OF ZOO

Zoo can help to save endangered species by keeping them in a safe environment as it protected from poachers, predators, habitat loss and even starvation .

zoo is able to conserve animals only and only if the zoo management system of the zoo is strong and good.

Zoological Parks educate the general public about the biodiversity that makes up the world . They help humans and wildlife coexist well. They carry out ongoing research and education for the people. They save important natural resources.

Some zoos have breeding programmes this is another way to protect endangered species which may have trouble finding suitable mates in the world.

Zoos are a living museum. What we learn about wild animals in captivity can help us manage and conserve them in the wild. From animal behaviour, to reproductive rates to dietary requirements.

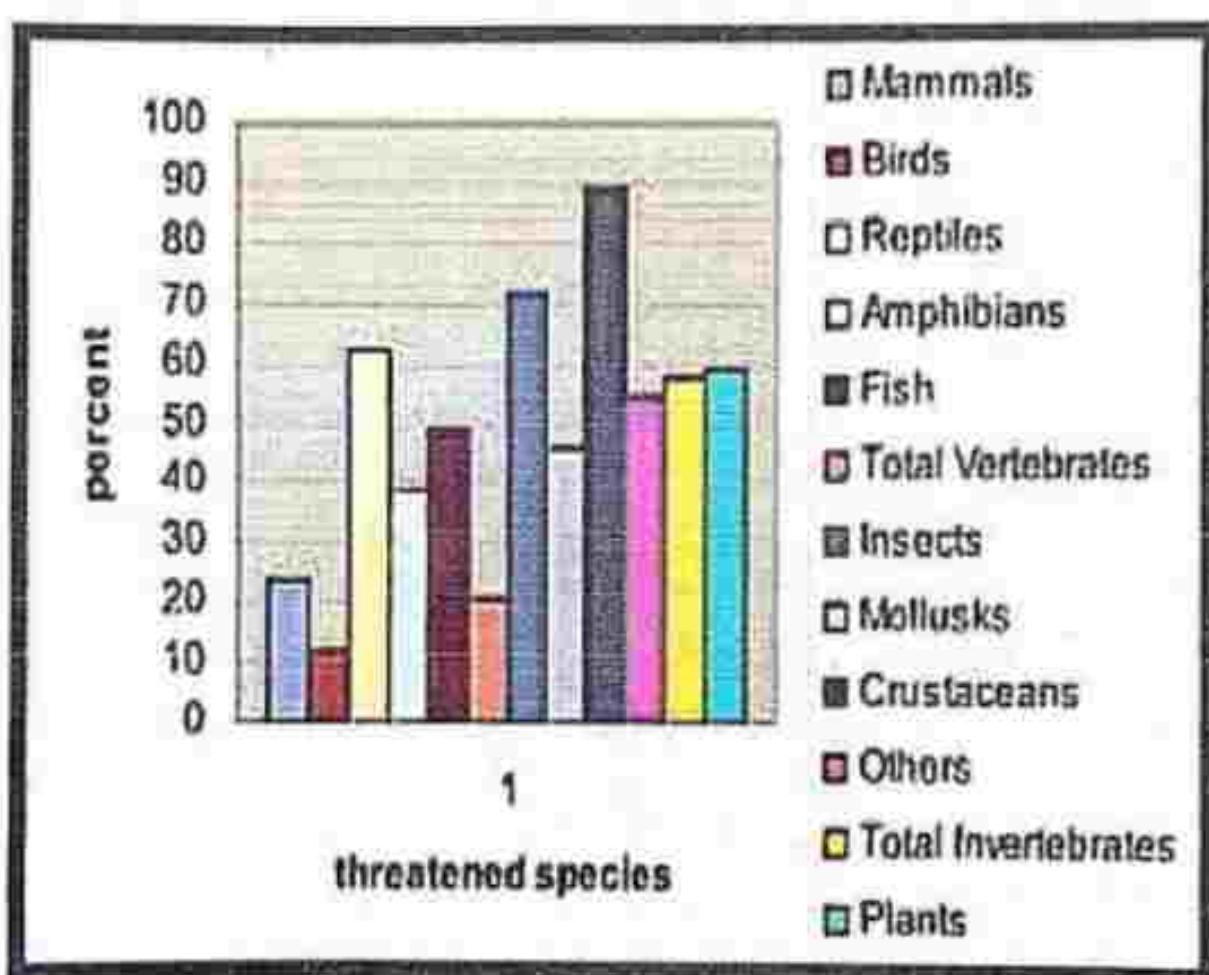

Zoos have an educational aspect.

Its easier to learn about an animal by seeing them in person.

Fostering empathy by seeing an animal up close ,the public might be encouraged to be more empathic to species that is facing extinction in the wild.

Main purpose of zoo is for conservation,for education, for recreation and for research.
