

"Green thumbs in the making: College hosts plantation program for local play school kids"

On the auspicious occasion of Teachers Day i.e 5th September 2024 our college campus was abuzz with excitement as we hosted a plantation program for a group of enthusiastic kids from Local Play School NANHE KADAM. The program aimed to instill environmental awareness and promote green habits among the young minds. The Principal Dr. (Mrs) Sasmita Lenka along with other staff members and students of the college became happy to see these young kids taking their first steps towards becoming responsible agent of nature."

Highlights:

- 30 kids from the play school, aged 4-6, participated in the program
- Our college students and faculty members guided the kids in planting saplings of medicinal plants and trees
- The kids learned about the importance of trees, soil conservation, and the role of plants in maintaining ecological balance
- The kids were given toffees as a token of love by the Principal.

Impact:

This initiative not only helped inculcate environmental values in the young kids but also provided an opportunity for our college students to develop their mentoring skills. We look forward to nurturing the saplings and the bonds formed today!
