15.What improvement do you suggest to improve both Class room & digital mode of learning ?

24 responses

There should be a smart class room so that students should also become advance with the technology.

Implementation of learning on the basis of quality of Students.....doubt clear classes & enhanced lab facility...

Need to improve class room infrastructure, establish of digital smart class room, and desktop should be provided to each laboratory.

I suggest to make more digital classroom

A computer lab should be made.

The introduction of smart class will be helpful towards a more interactive and engrossing classroom experience for the students.

WiFi should be made available for all and smart classes should be there and computer lab.

All class room should have digital mode and digital blackboard, WiFi facility in our campus,

There should be sufficient number of reference books available in library..

More of student participation and more of technological learning

Smart classes

Projector and desktop should be provided to each department.

We need zoology laboratory

Need digital classroom

No

Our class rooms are in good conditions. We need free wifi campus, more field trips for teaching...

We need free wifi connected campus and field trip for better teaching learning

Needed WiFi campus with active participation of students in teaching learning process.

More teaching staffs required. proper infrastructure in needed,and more students participation.

All good for me

Need big class room for compulsory subject (Aecc & Ge) ,some reference books for better teaching.

Seminar, group discussion and mock test series shoud be adopted to improve both class room and digital mode of learning.

Smart classes, doubt clear classes

WiFi connection is needed to more effective.
